Beaded Pull Tight Seal UV

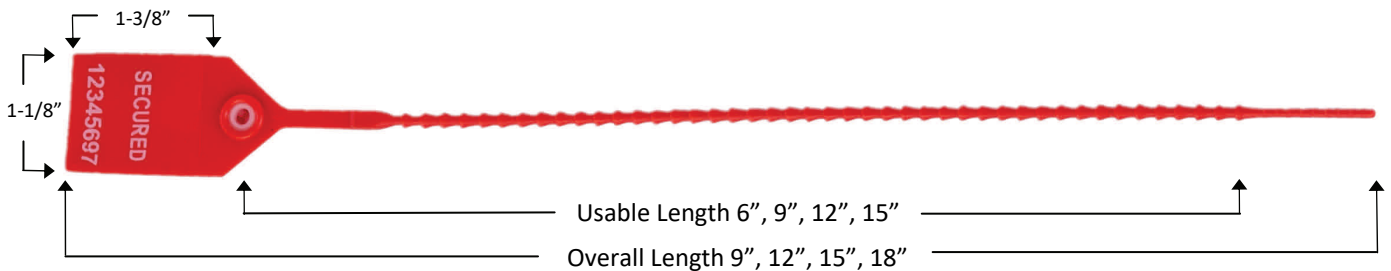

The Beaded Pull Tight's streamlined design strengthens the seal and makes it smooth and easy to use when securing items. The uniquely engineered Beaded Pull Tight Seal maintains a thinner diameter yet is stronger than industry alternatives. The combination of strength and thinner diameter is a critical benefit when securing items requiring the seals to fit through small apertures. Now with UV inhibitors. SGS tested to the equivalent of two years UV exposure resulting in no visible signs of color change, chalking or cracking. (ISO 4892-3:2016)

Common Applications:

- Trailer doors
- Bulk tankers
- Railroad cars
- Storage cabinets
- Storage totes
- Storage boxes
- Cash-in-transit

Features:

- Made of high-density polyethylene enhanced with UV inhibitors for greater durability in extreme weather.
- High temperature resistant locking chamber.
- "Clean Break" design ensures that individual seals detach from the strip without plastic waste.
- 40 lb. tensile strength.
- Extended flag size for additional information on the tab.
- Available in six colors: red, blue, green, yellow, orange, and white.
- Printing of text, serial numbers, logos or barcodes can be in black or white.
